SUMMARY

Java backend developer with 9 months of professional experience integrating external APIs and building rule-driven services with Spring Boot and PostgreSQL. Moving into data engineering: building batch pipelines, dimensional models, and orchestrated workflows. Seeking entry-level remote data engineering roles.

PROFESSIONAL EXPERIENCE

Intern Java Backend Developer, Taban Tech 2025 – 2026 | Tehran, Iran
Company Website

- Integrated third-party REST APIs (KYC facial recognition, payment gateway, inquiry services) into Spring Boot services, handling validation, error cases, and external data exchange.
- Built a rule-triggered SMS notification system for a customer loyalty program, evaluating business rules against customer data in PostgreSQL.
- Worked in an Agile/Scrum team using Git, Maven, and Postman/Apidog for delivery and API testing.

PROJECTS

Batch ETL Pipeline, Public API → PostgreSQL | Sep 2026 – Present (in progress) Sep 2026 – Present
Python, Airflow, Docker, PostgreSQL

- Building a scheduled daily pipeline that ingests weather data via REST API with incremental, idempotent loads
- Designing a star schema (fact and dimension tables) with indexing
- Adding data quality checks (nulls, duplicates, row counts) before load
- Design decisions documented in the README github.com/amiraliverse/data-pipeline-platform

jewelry Platform, Java, Springboot, Postgresql Aug 2026 – Present
visit **parvazigold**

SKILLS

Data
Python, SQL, PostgreSQL, Docker Basic

Tooling
Git, UV, anaconda, Pycharm, Zeditor, Apidog(API Platform)

Backend
Java, Jpa, DI, IoC, REST APIs

Languages.
English - Advance

AI
Claude Code, AI Development

EDUCATION

Master's Degree in Software Engineering 2025 – Present | Tehran, Iran
Islamic Azad University, Electronic Campus (Tehran)

Computer Engineering 2021 – 2025 | Lorestan, Iran
Technical and Vocational University of Khorramabad (TVU)

CURRENTLY LEARNING

Data modeling
star schema, facts vs dimensions, normalization, OLTP vs OLAP

Orchestration
Apache Airflow (DAGs, scheduling, retries, backfills)

ETL/ELT
batch ingestion, incremental and idempotent loads, data quality checks

Advanced SQL
window functions, CTEs, indexing and query plans with EXPLAIN
